## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to a bobbin structure, classified in class 336, subclass 198.
- II. Claims 9-15, drawn to an inductor assembly, classified in class 336, subclass 210.
- III. Claims 16-20, drawn to a kit assembly, classified in class 219, subclass 672.

The inventions are distinct, each from the other because of the following reasons:

Inventions [II] and [I, III] are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention [II] has separate utility such as the inductor assembly not using the bobbin structure of [I]; invention [III] has separate utility such as the kit assembly not using the inductor assembly of [II]. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
